

#11 Final Review and Special Topics

TA: Jerry Chen (jerry.c@berkeley.edu)

"The most disastrous thing that you can ever learn is your first programming language."

Alan Kay

Out of all the languages you learned in CS 61A, your favorite is...

Out of all the languages you learned in CS 61A, your favorite is...

22 responses

For the last discussion, would you be more interested in doing review problems or exploring fun CS topics?

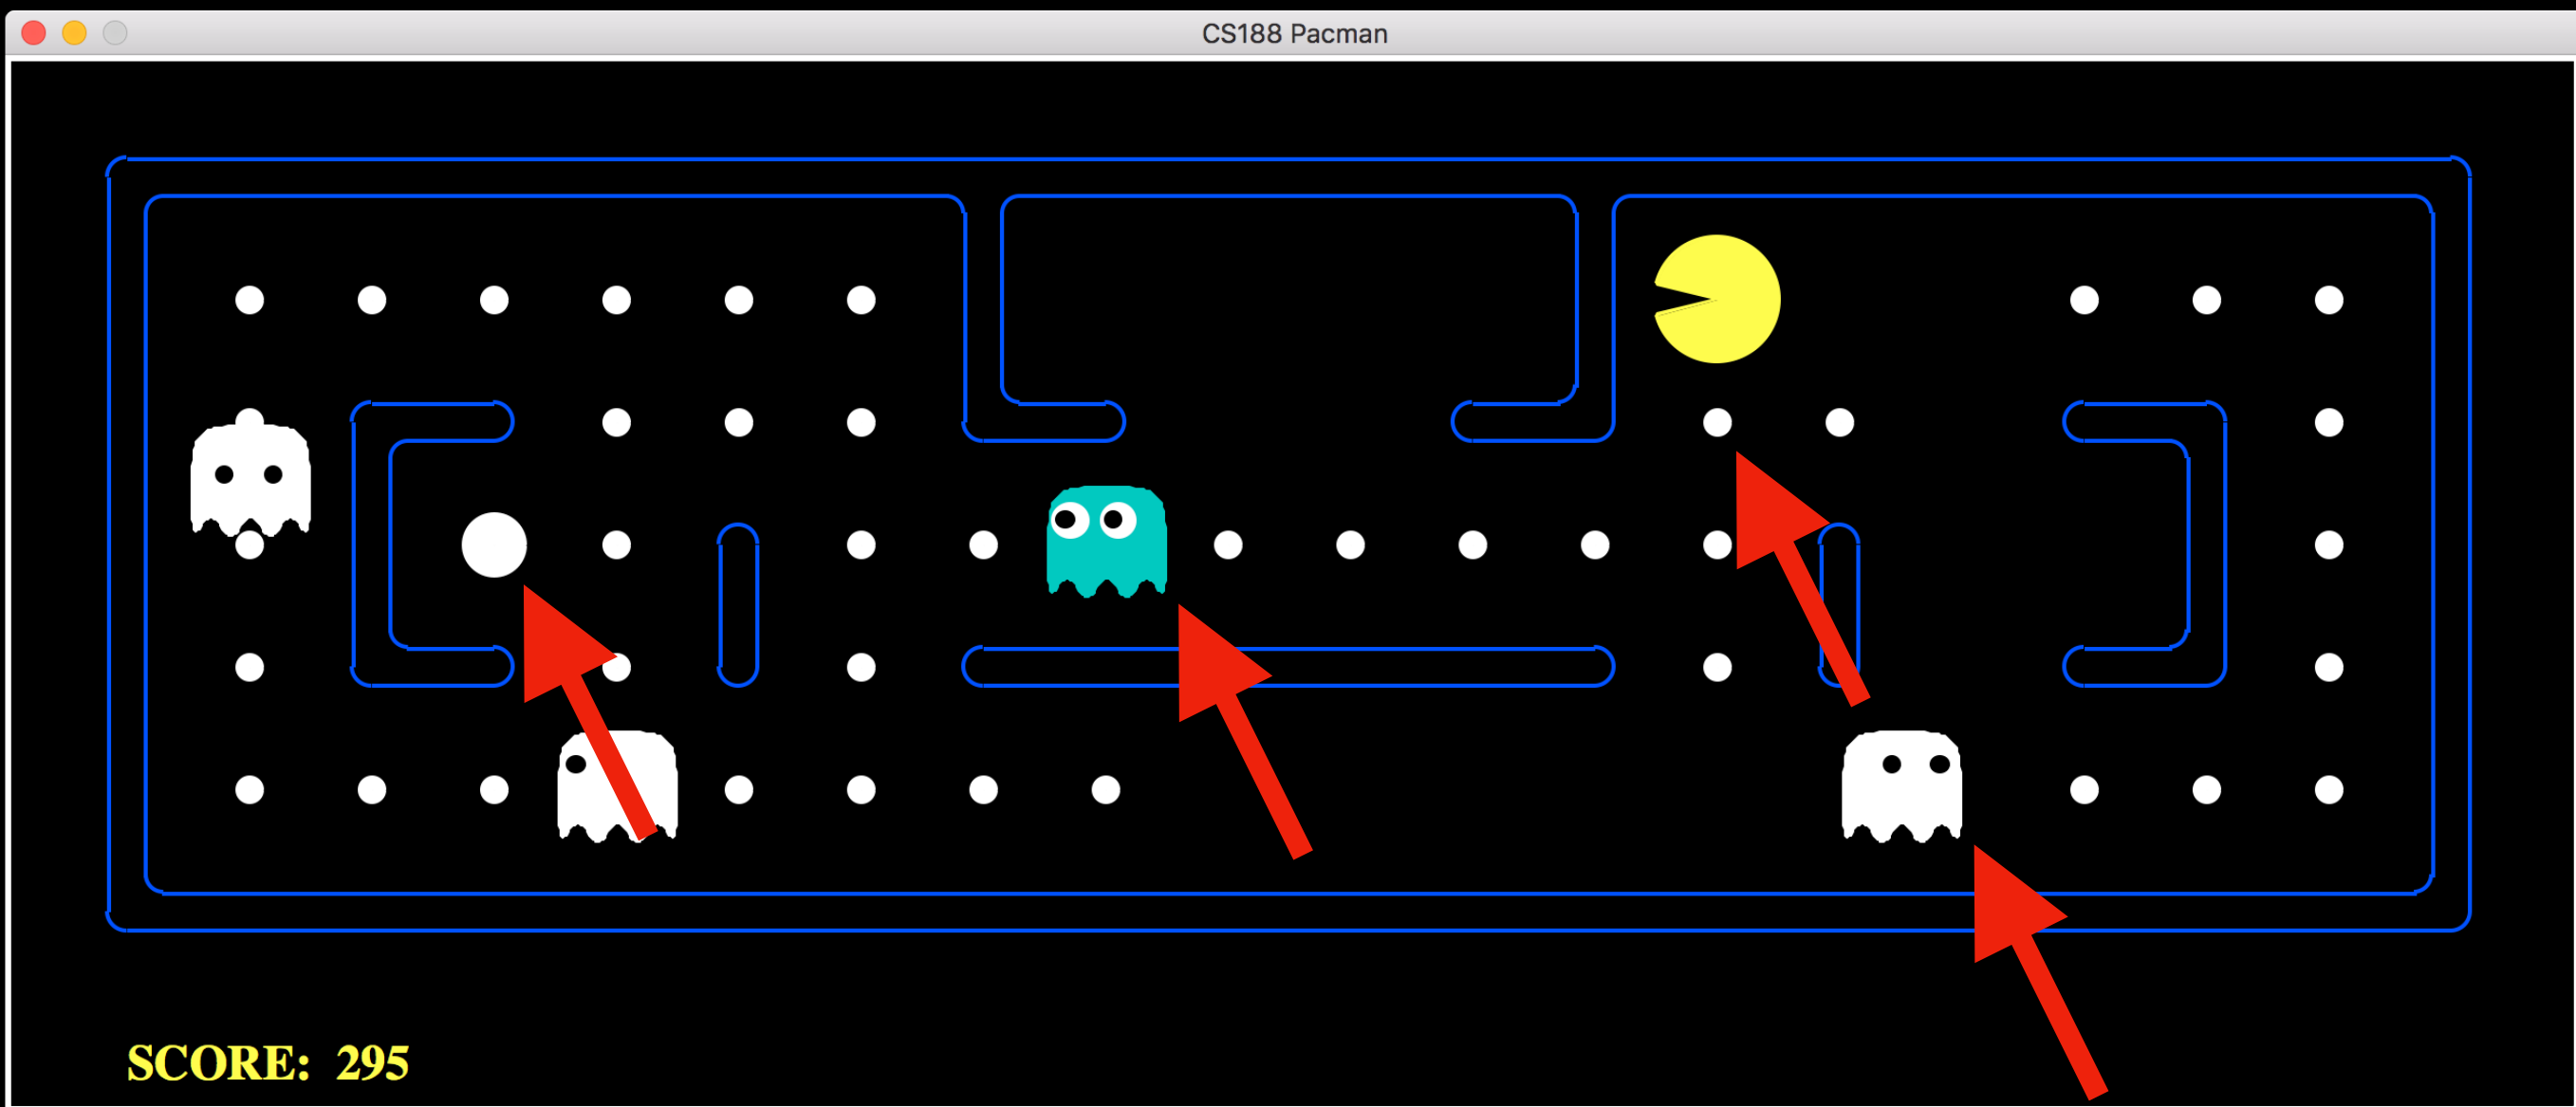

22 responses

Artificial Intelligence

Exploring Pacman

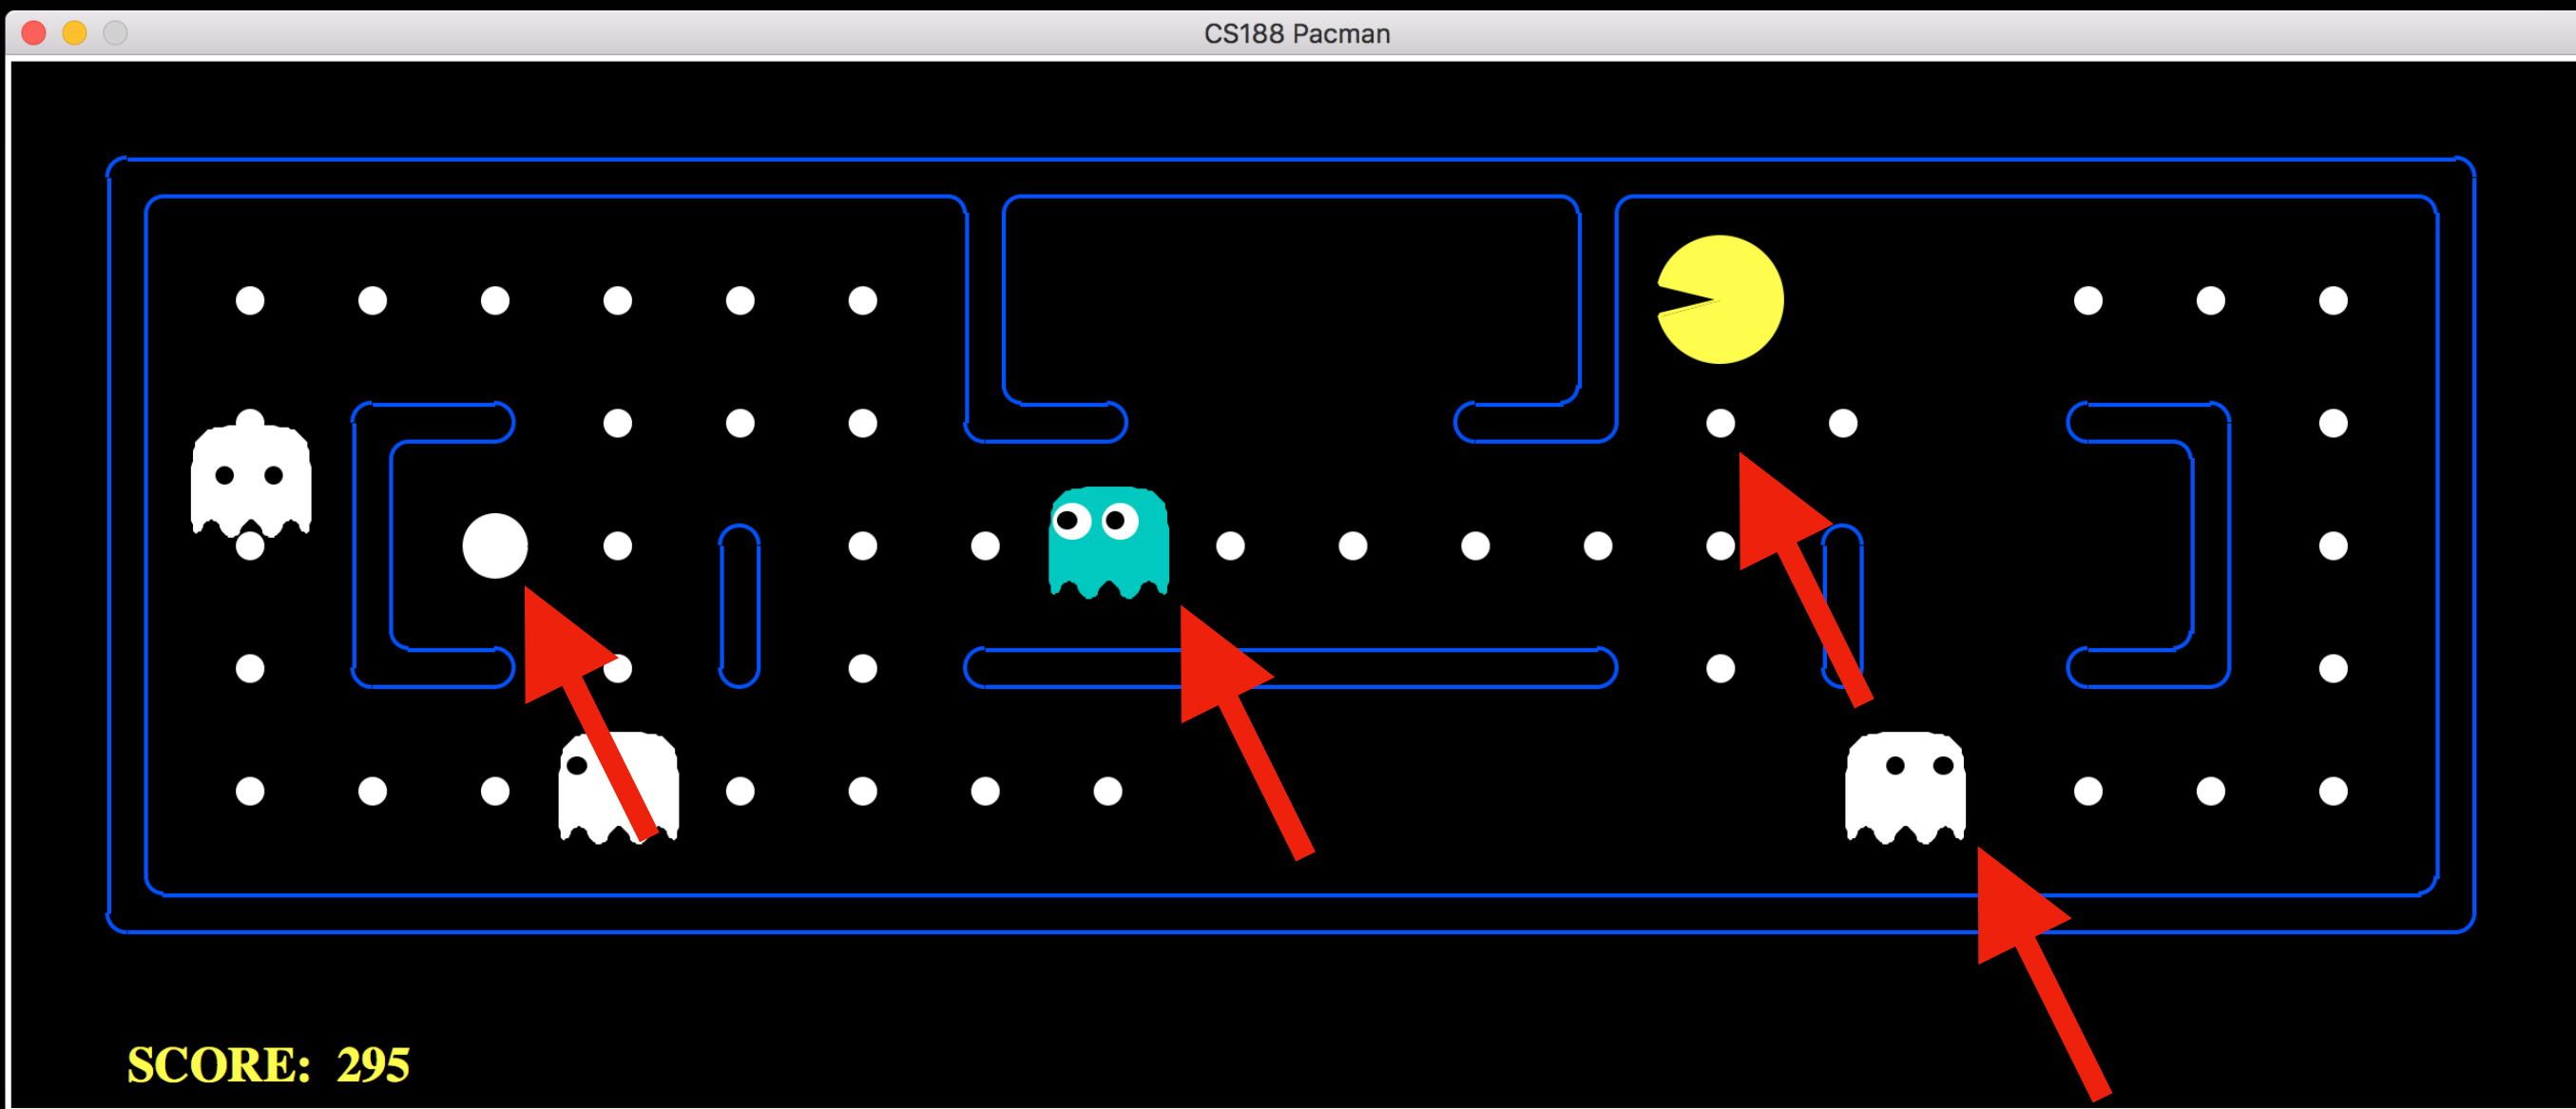

Pacman AI

Reinforcement Learning (Q Learning)

- Observe features
- Use weights to determine how important they are
- Through trial and error, learn the weights

Features

Pacman AI

Play!

Use the weights you learned to move(N/E/S/W/stay)

Digit classification

A slightly different problem

3	4	2	1	9	5	6	2	1	8
8	9	1	2	5	0	0	6	6	4
6	7	0	1	6	3	6	3	7	0
3	7	7	9	4	6	6	1	8	2
2	9	3	4	3	9	8	7	2	5
1	5	9	8	3	6	5	7	2	3
9	3	1	9	1	5	8	0	8	4
5	6	2	6	8	5	8	8	9	9
3	7	7	0	9	4	8	5	4	3
7	9	6	4	7	0	6	9	2	3

What features do
we use?

Convolution layer

Demo: <http://setosa.io/ev/image-kernels/>

Convolutional Neural Networks

Convolutional Neural Networks

LeNet 1 Demo (1993): https://www.youtube.com/watch?v=FwFduRA_L6Q

When Classification Goes Wrong

Another way to play Pacman

Using lexicographic ordering and time travel

More learning

Neural Networks

- <http://playground.tensorflow.org/>
- <https://quickdraw.withgoogle.com>

When classification goes wrong: <https://youtu.be/mSFHKAvtGNk?t=16m48s>

Learning to play other games: https://www.youtube.com/watch?v=xOCurBYI_gY (Pacman at 13:37)

Next Steps

What to do during break?

The answer depends on how you're feeling...

"I'm bored! Isn't there homework to do or something?"

Option A

If this is you, you're in luck!

- **Make your own website:**

<http://jmcglone.com/guides/github-pages/>

My web page is built using Jekyll and it's open source

- **Learn how to use Vim**, the world's coolest (modal) editor, or just have fun: <https://vim-adventures.com>
- **Learn LaTeX**, a commonly used typesetting language, by using it to make your resume

"I'm bored! Isn't there homework to do or something?"

Option A

Even more options:

- **Learn how to use Git**, a popular version control system:

<http://try.github.io/>

- **Learn some Java** to prepare for CS 61B:

<https://www.codecademy.com/learn/learn-java>

- Tighten up your **development setup**:

<http://jerryjrchen.com/cs61a/setup/>

"I think my head hurts now"

Option Get Me Outta Here

This one's easy:

- Read some books, preferably not textbooks
- Go watch movies (new Han Solo movie? Incredibles 2?)

But actually relax! You don't need me to tell you how to do that

Final Thoughts

- Thanks
- Look beyond CS 61A
- Goodbye

Final final thoughts

- **Please please please** fill out course evaluations! Go to the last lecture, it'll be great
- This is really important — **I don't have a middle name**
- Feel free to contact me: jerry.c@berkeley.edu

Where I've Worked

UC Berkeley EECS

- Lab assistant, Mentor for CSM, TA

Sandia National Labs

- Fun fact: "sandia" means watermelon in Spanish. I worked on satellites though

Optiver

- Fun fact: "Optiver" is a combination of the Dutch words for "options" and "trader"

Apple

- Fun fact: All iPhone screenshots by Apple display 9:41 AM as the time

Upper div CS Coursework I've Taken

Highlighted are the ones covered today

CS 188	Artificial Intelligence
CS 189	Machine Learning
CS 184	Computer Graphics
CS 186	Databases
CS 168	Introduction to the Internet
CS 161	Computer Security
CS 170	Algorithms
CS 162	Operating Systems
CS 164	Programming Langs & Compilers
CS 267	Parallel Computing

Other upper div coursework

EE 127

Optimization Models

EE 120

Signals and Systems

Stat 150

Stochastic Processes

Stat 135

Concepts of Statistics

Thinking of taking CS 70?

Introduction to Mathematical Thinking (IMT) DeCal

- Taught by Suraj, former Data 8 and current CS 61A TA
- Fill out interest.imt-decal.org
